Education

Florida International University, *BS in Computer Science*

Aug 2024 – May 2027

- **Courses:** Programming I & II, Data Structures, Algorithm Techniques, Computer Architecture, Database Management.
- **Activities:** Break Through Tech, INIT, ColorStack, Society of Hispanic Professional Engineers (SHPE).

Google Tech Exchange, *Technical Program*

Jan 2025 – May 2025

- **Selected from 1,500+ candidates** to receive technical interviews and system architecture/software engineering coaching.
- **Courses:** Algorithm & System Design, Introduction to Software Engineering, and Careers in Tech.

Experience

Lyft

May 2026 - Aug 2026

Software Engineer Intern

- Building **AI agents** harnessing telematics data to automatically verify rider self-service reports, in Python with LangSmith.

Cloudflare

Jan 2026 – Apr 2026

Software Engineer Intern

- Implemented network session logs for L4 traffic in Rust for Apollo, an internal routing service handling **100K+ requests/second** globally, **improving observability** to our teams and customers routing through our Zero Trust network.
- Built **end-to-end verification tests** into the existing test suite, ensuring correctness across service hops and restart scenarios.
- Coordinated schema and field precedence logic changes across three teams for connections with multi-service hops.

Florida International University

Jun 2025 – Jan 2026

Student Program Assistant

- Contributed to the expansion of computer science education for 100+ students by **coordinating workshops and curriculum** for Break Through Tech's Sprinternship program, and facilitating workshops initiatives for organizations like Code.org.

KBR, Inc.

May 2025

Software Engineer Intern

- Designed and implemented a **J1708 to MDF4 conversion mechanism in C++** targeting bare-metal embedded devices.
- **Developed a CI/CD pipeline** with a Python testing harness generating test byte streams on Azure DevOps.
- Delivered quickly in a **three-week-long sprint internship** hosted in collaboration with Break Through Tech.

Miami Dade College

Feb 2023 – Aug 2025

Computer Science Tutor

- Coached **over 100 students** on implementing data structures and creating projects using Java, C/C++, SQL, and Python.
- **Increased students' grades by 50%** and increased their classroom participation rates.

Competitions

NASA Lunabotics Challenge 2025, *FIU Panther Robotics*

github.com/FIU-Lunabotics/FIU-Luna0

- Developed a client-server architecture in Python for a lunar rover in a team of 15+ people, for real-time communication through Unix sockets between inputs from a Linux device to the rover's Raspberry Pi, using Arduinos for motor control.

ICPC Southeast USA Regional 2022, *MDC Cybersharks*

- Won silver medal in Division 2 with my group of 3 teammates, solving the proposed challenges using Java and Python.

Projects

dim – *Rust, Wayland, Github CI, Linux Packaging*

github.com/marcelohdez/dim

- CLI utilizing **Wayland's single pixel buffer protocol or SHM buffers** depending on support to dim screens programmatically.
- Packaged for RPM and AUR with shell completion installation. **GitHub CI ensures compilation and manpage generation.**

atmpt – *Rust, Github CI, Command-Line*

github.com/marcelohdez/atmpt

- Create and open temporary coding projects in your editor, leading to a **decrease in time-to-code by 40%**.
- Implemented CI/CD pipeline with GitHub Actions for **automated testing**.

Bedroom – *Java, Swing API, Data Visualization*

github.com/marcelohdez/bedroom

- **Zero-dependency Java application** for call center agents to track their orders with **interactive data visualization**.
- Implemented customizable UI and shortcuts, **improving productivity and reducing manual calculations**.

Skills

Languages: Rust, Go, Python, C/C++, JavaScript/TypeScript, Java, Bash/Shell, SQL

Technologies: Git, CI/CD, Linux/Unix, Azure DevOps, Node.js, React/Next.js, Vim, Streamlit
